Aimed at veterinarians, students, professors and professionals in this field.

**TECHNICAL SPECIFICATIONS**

- **Authors:** Servet publishers
- **Format:** 21 x 29.7 cm
- **Number of Pages:** 100
- **Binding:** Hardcover, wire-o
- **ISBN:** 978-84-691-6390-0
- **RRP:** 85 €

This notebook includes drawings of anatomical structures, most frequent ailments and some of the most commonly used surgical techniques in dogs and cats. Its purpose is to facilitate communication between vets and clients, since it will enable vets to explain graphically what is happening to the pet, where, and the procedure for the possible resolution of the problem.
Pet Owner Educational Atlas. Surgery series

CONTENTS

1. Skin and integument
   - Pedicle skin flap
   - Mesh skin graft

2. Eye and eyelids
   - Entropion
   - Ectropion
   - Prolapsed 3rd eyelid gland
   - Eversion of the 3rd eyelid
   - Cataracts
   - Corneal ulcer

3. Ear and pinna
   - Ear canal ablation
   - Tympanic bulla osteotomy
   - Aural haematoma

4. Abdominal Cavity
   - Anatomy of the abdominal cavity (dog)
   - Anatomy of the abdominal cavity (cat)
   - Umbilical hernia
   - Inguinal hernia

5. Digestive system
   - Normal canine teeth
   - Normal feline teeth
   - Tartar and periodontal disease
   - Malar abscess
   - Oronasal fistula and palatine groove
   - Oesophageal foreign body
   - Oesophageal stenosis
   - Oesophageal diverticulum
   - Hiatus hernia
   - Persistent right aortic arch (PRRA)
   - Gastric foreign body. Gastrotomy
   - Gastric dilatation-volvulus. Gastropexy
   - Intestinal foreign body.
     - Enterotomy/Enterectomy
   - Intestinal intussusception
   - Intestinal volvulus/Torsion
   - Megacolon
   - Infection/Impaction of the anal sacs
   - Perineal hernia
   - Perianal fistulas
   - Rectal prolapse
   - Hepatic neoplasia. Partial lobectomy
   - Cholelithiasis (Gallstones)

6. Endocrine and Haemolymphatic System
   - Adrenal neoplasia. Adrenalectomy
   - Hypophyseal neoplasia
   - Abscesses, pseudocysts and neoplasias.
     - Pancreatectomy
   - Feline hyperthyroidism. Thyroidectomy
   - Splenic torsion
   - Splenic haemangiosarcoma. Splenectomy

7. Urogenital System
   - Ectopic ureter
   - Urolithiasis or kidney stones
     (Kidney, ureter and bladder)
   - FLUTD (Feline Lower Urinary Tract Disease)
   - Ovariohysterectomy
   - Canine/Feline orchidectomy
   - Caesarean section
   - Prostatic neoplasia/abscess/ hyperplasia.
     - Prostatectomy
   - Mammary gland neoplasia. Mastectomy
   - Pyometra
8. **Cardiovascular System**
   - Patent ductus arteriosus
   - Pulmonary stenosis
   - Aortic stenosis
   - Ventricular septal defect
   - Tetralogy of Fallot
   - Haemangiosarcoma/ Pericardial effusion

9. **RESPIRATORY System**
   - Tracheal collapse
   - Pulmonary neoplasia. Partial lobectomy
   - Pleural effusion. Drainage
   - Diaphragmatic hernia
   - Thymoma

10. **Musculoskeletal System**
    - External fixator
    - Cerclage wire
    - Intramedullary pin
    - Tension band
    - Internal fixation. Screw + DCP plate
    - Cranial cruciate ligament rupture
    - TPLO (Tibial plateau levelling osteotomy)
    - TTA (Tibial tuberosity advancement)
    - Wedge osteotomy
    - Fabellotibial suture
    - Hip dysplasia. Triple pelvic osteotomy
    - Shoulder OCD (Osteochondritis dissecans)
    - Intervertebral disc extrusion. Laminectomy
    - Ununited anconeal process. Elbow dysplasia
    - Fragmented medial coronoid process (FMCP)
    - Stifle arthroscopy
    - Total hip replacement
    - Meniscal injury
    - Patellar luxation
**Corneal ulcer**

- Cornea
- Corneal ulcer

**Ear canal ablation**

- Inflammation
- Suppuration
- Auricular cartilage
- Suppuration
- Epithelial inflammation of the auricular canal
- Chronic purulent otitis
Tartar and periodontal disease

GRADE I
Onset of tartar

GRADE II
Tartar

GRADE III
Gum recession

GRADE IV
Tartar and periodontal disease

Malar abscess

Fistula
Root of the tooth
**FLUTD** (Feline Lower Urinary Tract Disease)

**Ovariohysterectomy**
